

INDEPENDENT STOCKING DISTRIBUTOR

The freedom to say **yes.**

Franchise distribution runs into walls — a brand they don't carry, a part that's gone obsolete, a quantity they can't allocate, a region they don't serve. That's exactly where we begin.

ANY BRAND

ANY QUANTITY

ANY REGION

OBSOLETE OK

RH Electronics Inc. is a leading independent, global, stocking distributor of electronic, electrical, and electro-mechanical components. Founded in 1982, we are an **ANSI/ESD-S20.20** and **ISO 9001:2015** certified **Women-Owned Small Business** — the link between manufacturers, distributors, and the businesses that build the world's hardware.

Franchise has limits. We don't.

Independence isn't a limitation — it's what sets us free. We're not bound to a fixed roster of brands, a fixed allocation, or a fixed map. If the part exists, we can find it: any manufacturer, any quantity, anywhere in the world.

01

Any Manufacturer

No authorized-brand list to box you in. We're free to source across the entire market — not just the lines a franchise agreement permits.

02

Obsolete & Discontinued

We actively support the end-of-life, hard-to-find, and last-time-buy parts that franchise distribution can no longer touch.

03

Inventory Others Can't See

We reach stock outside the franchise channel — including worldwide overstock — opening sources that simply aren't on the authorized map.

04

No Quantity Ceiling

Franchise sells what it's allocated. We sell what you need — a single piece or a hundred thousand — without an allocation gate.

05

No Regional Lines

We aren't confined to a territory. Wherever your operation runs, we support it — across borders, time zones, and continents.

06

Lead Times, Crushed

Offices around the globe let us shorten — or eliminate — the long lead times that stall production lines and delay shipments.

**Independent enough to find anything.
Disciplined enough to trust.**

Every component is traced and verified — sourced through the original manufacturer or authorized channel, backed by a recognized counterfeit-mitigation program and our ISO 9001:2015 quality system.

One search, a **global** reach.

— OUR METHOD

Distribution flows both ways. RH Electronics sits at the center of procurement and marketing for OEMs, contract manufacturers, and authorized and independent distributors alike.

We proactively **cross-check your requirements** against material moving through your own industry, and use advanced tools to find approved alternates when a part runs scarce. Once it's sourced, we move — with **overnight and same-day delivery** when the line can't wait.

Shortages are inevitable; their cost to your production isn't. Our job is to **bridge the gap before it reaches your floor**.

— OUR GLOBAL MARKETPLACE

Manufacturers price the same component differently around the world — gaps of **20–50%** between regions are common.

Our purchasing teams in eight countries turn that into your advantage, with direct access to worldwide overstock at significantly reduced cost. Every search is cross-checked against **30+ years** of sales, quotes, invoices, and excess-inventory history.

If a part isn't in our own stock, we launch a global sourcing process across every authorized distributor of your manufacturer — with a high success rate.

Every component, traced and verified.

Counterfeit mitigation isn't a checkbox — it's a lab. Our in-house inspection and authentication capabilities let us verify exactly what we ship, down to the die.

 <p>XRF Analysis</p> <p>Measures metallurgical composition for RoHS compliance and lead-finish / plating verification.</p>	 <p>Blank Verification</p> <p>Confirms that programmable devices have not been pre-programmed.</p>	 <p>Microscopy</p> <p>High-resolution die imaging at up to 3,000x magnification.</p>
 <p>Pinprint Detection</p> <p>Captures the unique electrical "pin-out" signature for comparison against a known-good device.</p>	 <p>Heat Treatment</p> <p>Bake and dry-pack for components with moisture-sensitive packaging requirements.</p>	 <p>X-Ray</p> <p>Real-time, non-destructive imaging and comparative analysis against verified references.</p>
 <p>FTIR Spectroscopy</p> <p>Light-spectroscopy analysis to confirm plastic-package material homogeneity.</p>	 <p>Nitrogen Vacuum Pack</p> <p>High-purity N₂ flush displaces air and moisture, delaying oxidative deterioration of delicate parts.</p>	 <p>Decapsulation</p> <p>Exposes the component die for full microscopic, visual die verification.</p>

VALUE-ADDED SERVICES

- RoHS / ITAR / REACH conversions
- Component authentication
- DNA component marking
- Bake / seal moisture expulsion
- Nitrogen vacuum dry-packaging
- Electrical & curve-trace testing
- X-ray die verifications
- Kitting
- Tape & reeling
- Lead forming / straightening
- Powder coating & gold / copper / nickel plating
- Ultrasonic cleaning with degas technology
- Custom label & packaging
- Barcoding
- Custom-manufactured hardware
- Decapsulation services
- Product Change Notices (PCNs)

Turn excess into liquidity.

Sitting inventory is trapped capital. Our excess-management team — backed by 60 years of combined market experience — markets and liquidates your surplus on the global market, with the highest possible return as the first priority.

OPTION 01

We purchase your excess inventory outright.

Your advantage: turn unmarketable stock into liquid assets and free up storage space — with possible tax benefits on depreciated material.

OPTION 02

We market your excess while you warehouse it.

Your advantage: keep your inventory on hand and a role in pricing, while our specialists actively sell it on the global market.

OPTION 03

We warehouse and market your excess inventory.

Your advantage: free your storage, access goods anytime, and let us respond to demand instantly — speeding the entire liquidation process.

— WAREHOUSING BUILT AROUND YOUR TIMELINE

SHORT-TERM

Day-to-day business with quick turnaround for fast-moving demand.

MEDIUM-TERM

Just-in-time delivery for active projects, with no intermediate resale of goods.

LONG-TERM

Hedge against shortages and shrink the time between procurement and manufacturing.

60

years combined market experience
